

The foundation scholarship program has now gone online!

Our new online application is designed to make it easier for students to apply. However, we need you to spread the word! If you know anyone in your shop – or anyone else – who can benefit, let them know. These scholarships are available to anyone who wants a career in the plumbing, HVAC and electrical field. Scholarships are also available to those who want to increase their industry skills. From marketing specialists to technicians, our goal is to improve the skills of talented employees. If you know someone who could benefit from a foundation scholarship, encourage him/her to apply. **Applications for most scholarships are due by February 28, 2012.**

Since its inception, the foundation has been about providing scholarships to students in the plumbing, HVAC and electrical fields. In the past five years, the foundation has given away over \$100,000 in scholarship funding. In 2012, the foundation, along with its partners, will be offering our largest scholarship program ever, with \$32,000 going to students for the 2012-2013 academic year.

The foundation held its most successful event ever with 212 people attending the Grand Ole Opry dinner and show during the Nexstar Super Meeting in Nashville, Tennessee. Attendees had a southern style BBQ in the Grand Ole Opry's very own Studio A. They were then escorted through a very special backstage tour and given premier seating for the Grand Ole Opry show.

The foundation is very excited to launch a brand new program this year The Foundation Partner Program!

It is a brand new way Nexstar Strategic Partners and Nexstar members can support the foundation!

Initiated by two of Nexstar's Strategic Partners, Goodman and ProSystems, this program allows vendors and members an opportunity to become partners with the foundation, providing deeper support.

To date, the foundation has seven partners who will donate as follows:

- Goodman – 2% of every incremental Nexstar sale to the foundation.
- ProSystems – 1% of all Nexstar sales to the foundation.
- Barnett – \$5000 scholarship.
- American Water Heaters – 1% of all Nexstar sales to the foundation.
- John Ward – \$5,000 scholarship.
- Marty Donnelly – \$20,000 in scholarships.
- Nexstar, Inc. will continue to make a generous financial donation.

NEXSTAR LEGACY FOUNDATION PARTNER PROGRAM

Looking For High Quality Employees?

In 2012, the foundation will be working hard to broaden our impact in the fields of plumbing, HVAC and electrical. For the last six years, the foundation has focused on providing scholarships to students interested in entering the trades.

We know this isn't enough. In 2012, we will create a system to aggressively enlarge the number of high-quality, talented employees in our industry. We will do this by showing thousands of students the opportunities of a career in plumbing, HVAC or electrical.

This will not be an easy road. It will take time to reach quality students and show them this new vision, but we believe we can be a force that inspires many to enter these fields as technicians and service providers.

We're crafting our strategy, stay tuned and see what happens!
